

ALLEZ[®] 350 SC

BROAD-SPECTRUM, SYSTEMIC INSECTICIDE THAT PROVIDES EFFECTIVE, ECONOMICAL CONTROL OF A RANGE OF INSECTS.

Albaugh ALLEZ[®] 350 SC Insecticide is a systemic soil- and foliar-applied insecticide that provides economical control of a wide range of insects in a variety of crops. When applied to the soil, moves from the plant's root system to the upper vegetative parts via the xylem tissue. This results in extended insecticidal activity to control pests that can vector detrimental virus transmission. ALLEZ[®] 350 SC can be applied to a variety of crops to provide selective control of many key piercing, sucking insects.

PRODUCT OVERVIEW

- Offers outstanding, long-lasting control of aphids, azalea lace bug, woolly aphid, citrus leaf miner, pink wax and red scale, leafhoppers, mealybugs, whiteflies and many other piercing, sucking insects.
- May be applied by ground, aerial or chemigation systems for the reduction and prevention of virus transmission by insects.
- Systemic insecticide with translaminar, contact and stomach action for the control of crop pest insects. The plant absorbs it easily, translocates acropetally and presents good systemic action.

See label for complete application guidelines and restrictions.

ACTIVE INGREDIENT

350 g/L Imidacloprid

I.R.A.C. GROUP

GROUP 4A INSECTICIDE

FORMULATION

Suspension Concentrate

POISON SCHEDULE

Schedule 6

COMPARE TO

Various

MODE OF ACTION

Nicotinic acetylcholine receptor competitive modulator

SIGNAL HEADING

POISON
KEEP OUT OF REACH OF
CHILDREN
READ SAFETY DIRECTIONS
BEFORE OPENING OR USING

PROTECTION

Dangerous to bees

PACKAGING

10LTR, 20LTR

APVMA APPROVAL NO.

69506/141464
