

APRISCO® 720 SC

MULTI-SITE CONTACT FUNGICIDE FOR THE CONTROL OF A VARIETY OF DISEASES IN A SUSPENSION CONCENTRATE FORMULATION

Albaugh APRISCO® 720 SC Fungicide is a NON-systemic fungicide with a broad leaf spectrum with some protective properties, with multi-site action (FRAC M5). Its risk of resistance is low because it is a fungicide with a multi-site mechanism of action, ideal for preventive application in the control of a wide range of pathogenic fungi in crops.

For the control of fungal diseases on almonds, apricots, bananas, chickpeas, carrots, celery, cherries, faba beans, grapes, lentils, onions, peaches, peanuts, peas, plums, potatoes, tomatoes and vegetables as per the Directions for Use Table.

PRODUCT OVERVIEW

- Compatibility: APRISCO® 720 SC is compatible with wettable powder formulations of the most commonly used fungicides, insecticides and miticides.
- Excellent multi-site fungicide that controls diseases such as *Ascochyta* blight (*Ascochyta lentis*), botrytis blight, botrytis cinerea, botrytis rot, brown rot, bunch rot, grey mould, peanut rust.
- Do not mix spraying oils or wetting agents with APRISCO® 720 SC.
- APRISCO® 720 SC is a protectant fungicide only. APRISCO® 720 SC must be applied before diseases occur/ become established to be highly effective. Use disease warning services or past history to determine timing of first spray. If diseases are already present then an eradicant product should be used first and mixed with APRISCO® 720 SC.
