

APRISCO® 900 WG

MULTI-SITE CONTACT FUNGICIDE FOR THE CONTROL OF A VARIETY OF DISEASES IN A WATER-DISPERSIBLE GRANULE FORMULATION

Albaugh APRISCO® 900 WG Fungicide is a NON-systemic fungicide with a broadleaf spectrum with some protective properties, with multi-site action (FRAC M5). Its risk of resistance is low because it is a fungicide with a multi-site mechanism of action, ideal for preventive application in the control of a wide range of pathogenic fungi in crops.

For the control of fungal diseases on almonds, apricots, bananas, chickpeas, carrots, celery, cherries, faba beans, grapes, lentils, onions, peaches, peanuts, peas, plums, potatoes, tomatoes and vegetables as per the Directions for Use Table.

PRODUCT OVERVIEW

- Excellent multi-site contact fungicide that provides control of diseases such as *Phomopsis*, scab, leaf spot, powdery mildew, brown rot, *Botrytis* (blossom-end rot & bunch rot) and many others.
- Highly concentrated, dry formulation allows for efficient storage and handling.
- This product is a protectant fungicide for the control of a range of diseases in fruit and vegetables.
- For effective disease control a good leaf cover must be achieved before a widespread disease outbreak occurs.
- Compatibility: This product is compatible with wettable powder and flowable formulations of most commonly used fungicides, insecticides and miticides. Unless experience in your area has shown other combinations to be physically compatible and non-injurious to your crop, do not combine with other chemicals, especially oil-based emulsifiable or flowable pesticides.
- This product should not be mixed with spraying oils or sprayed onto crops that have been sprayed with oil for at least 10 days after the last spray.
