

**NON-SELECTIVE  
HERBICIDE**

# DURANGO® 450 SL

**NON-SELECTIVE HERBICIDE FOR THE CONTROL OF A BROAD  
RANGE OF ANNUAL AND PERENNIAL WEEDS**

## PRODUCT OVERVIEW

- Albaugh DURANGO® 450 SL Herbicide is a non-selective liquid herbicide effective in the control of many annual and perennial grasses and broadleaf weeds in crop areas, land preparations and non-crop areas.
- This product is inactivated on contact with the soil and does not provide residual weed control.
- It is absorbed by the plant foliage and green stems and moves through the plant from point of contact to root system.
- Visible effects are gradual yellowing and wilting of the plant which advances to complete browning of growth above the ground and deterioration of underground plant parts.
- Visible effects takes 3 to 7 days on annual weeds, whereas on perennial weeds it may take 2 to 3 weeks or longer depending on weather conditions following spraying.
- No withholding period is required for this product. However, to ensure herbicide absorption, grazing of treated areas should be delayed at least one day after treatment of annual weeds and 7 days for perennial weeds.
