

DURANGO® ULTRA 540K SL

**NON-SELECTIVE HERBICIDE FOR THE CONTROL OF A RANGE
OF ANNUAL AND PERENNIAL WEEDS**

PRODUCT OVERVIEW

- Albaugh DURANGO® Ultra 540K SL Herbicide is recommended for control of emerged weeds prior to crop establishment. Cultivation and/or planting operations which provide conditions suitable for crop emergence and establishment are required following herbicide application.
- Where heavy weed growth is present or soil conditions are unsuitable, planting should be delayed to allow for decay of weeds and/or development of more favourable soil conditions for the formation of a suitable seedbed.
- Incorporation of green or decaying vegetation may retard crop emergence under cold, wet conditions.
- Vegetation may be reduced by grazing and weed decay may be assisted by cultivation to leave trash on the surface.
- Southern Australia: Prior to sowing a crop or pasture with full soil disturbance by cultivation or sowing with a tyned instrument.

ACTIVE INGREDIENT

540 g/L Glyphosate present as the Potassium Salt

H.R.A.C. GROUP

GROUP 9 HERBICIDE

FORMULATION

Soluble Concentrate

POISON SCHEDULE

Schedule 5

COMPARE TO

Various 540 g/L glyphosate

MODE OF ACTION

EPSP synthase inhibitor

SIGNAL HEADING

CAUTION
KEEP OUT OF REACH OF
CHILDREN
READ SAFETY DIRECTIONS
BEFORE OPENING OR USING

PACKAGING
