

# ROMETRI® 480 SC

FOR SELECTIVE WEED CONTROL IN VARIOUS BROADACRE  
AND VEGETABLE CROPS

Albaugh ROMETRI® 480 SC Selective Herbicide is effective against a range of broadleaf weeds and some grasses. ROMETRI® 480 SC is absorbed by roots, shoots and leaves of weeds. It can therefore be applied before or after weeds emerge depending on the tolerance of the crop being treated.

Application: General - best results are obtained if treatment is made to moist soil and moisture is supplied by rainfall or sprinkler irrigation (6-12 mm) within 2 weeks after application. If heavy rains occur soon after application, injury to the crop may result.
