

**NON-SELECTIVE
HERBICIDE**

ZIPPER® 200 EC

**FOR NON-RESIDUAL CONTROL OF BROADLEAF AND GRASS
WEEDS IN VARIOUS SITUATIONS AS SPECIFIED**

- Albaugh ZIPPER® 200 EC Herbicide is a non-volatile herbicide with non-selective activity against many annual and perennial broadleaf weeds and grasses.
- ZIPPER® 200 EC is absorbed by plant foliage and green stems. It is not significantly translocated as an active herbicide throughout the plant, and therefore will only kill that part of a green plant that is contacted by spray.
- ZIPPER® 200 EC does not provide residual weed control. Visible symptoms of control appear in 3 to 7 days, but complete desiccation may take 20 to 30 days under cool conditions.
- Best results are achieved when application is made under good growing conditions.
- Application to weeds under stress (e.g. due to continuous severe frosts, dry or waterlogged conditions) should be avoided.

PRODUCT OVERVIEW

- **Compatibility:** ZIPPER® 200 EC is compatible with most residual herbicides, e.g. simazine, diuron, oxyfluorfen (Goal®), norfluazuron (Solicam®) and oryzalin (Surflan®). The addition of a wetting agent or other adjuvant is generally not considered necessary. However, benefit has been obtained using a wetting agent on hard-to-wet weeds when using water rates in excess of 500 L/ha. The rate is 25 mL/100 L of a 1000 g/L non-ionic wetting agent, or equivalent.

ACTIVE INGREDIENT

200 g/L Glufosinate-Ammonium

H.R.A.C. GROUP

GROUP 10 HERBICIDE

FORMULATION

Emulsifiable Concentrate

POISON SCHEDULE

Schedule 5

COMPARE TO

Liberty®

MODE OF ACTION

Glycine group inhibitor of glutamine synthetase

SIGNAL HEADING

CAUTION
KEEP OUT OF REACH OF
CHILDREN
READ SAFETY DIRECTIONS
BEFORE OPENING OR USING

PACKAGING

20LTR, 1000LTR

APVMA APPROVAL NO.
