

HERBICIDE

TRIAD T SELECT[®]

**FOR SELECTIVE, POSTEMERGENCE
BROADLEAF WEED CONTROL.**

Triad T Select[®] is a selective, postemergence broadleaf herbicide containing four active ingredients to control listed annual and perennial broadleaf weeds in Kentucky bluegrass, perennial ryegrass, and tall and fine fescues. Weed control symptoms may be seen within a few days after application. The most noticeable symptom is bending and twisting of stems and leaves. Weed death often occurs in 1-4 weeks post-application, depending on the application rate, sensitivity of the target weed, and environmental conditions.

PRODUCT FEATURES

- Popular tank mix now available in a convenient pre-mix formulation.
- Improved cool-weather performance.
- Excellent postemergence activity with proven rapid and effective weed control performance for some of the toughest broadleaf weeds in turfgrass.
- Controls more than 80 weeds including difficult-to-control species such as plantain, ground ivy, *oxalis*, spurge, speedwell, and wild violet.
- Rainfast in 4 hours.

LABELED USES

- Sod farms
- Ornamental turfgrasses
- Non-crop sites

See label for complete application guidelines and restrictions.

ACTIVE INGREDIENTS

30.89% 2,4-D
8.23% MCPA
7.25% triclopyr
2.77% dicamba

HRAC GROUPS

2,4-D - Group 4
MCPA - Group 4
Triclopyr - Group 4
Dicamba - Group 4

FORMULATION

Liquid concentrate

CHEMICAL FAMILIES

Phenoxy acids, pyridines,
benzoic acids

COMPARE TO

Proprietary formulation

MODE OF ACTION

Auxin mimic

RESTRICTED USE

No

SIGNAL WORD

Warning

PACKAGING

2 x 2.5 gal, 30 gal drum
