

DICAMBA DMA SALT

WATER-SOLUBLE FORMULATION INTENDED FOR CONTROL AND SUPPRESSION OF MANY ANNUAL, PERENNIAL AND BIENNIAL BROADLEAF WEEDS, AS WELL AS WOODY BRUSH AND VINES.

Dicamba DMA Salt is a water-soluble formulation intended for control and suppression of many annual, perennial, and biennial broadleaf weeds, as well as woody brush and vines. Dicamba DMA Salt may be used for control of these weeds in corn, sorghum, small grains (wheat, barley, and oats), pasture, hay, rangeland, general farmstead (non-cropland), fallow, cotton, sugarcane, asparagus, turf and grass seed crops.

PRODUCT FEATURES

- Readily absorbed through root and shoot uptake, translocating throughout the plant, and accumulating in areas of active growth.
- Low probability of selecting for resistant weed biotypes.
- Can be applied through ground or aerial application equipment with water or sprayable liquid fertilizer as the carrier.

ACTIVE INGREDIENT

4.0 lbs/gal dicamba DMA salt

HRAC GROUP

4

FORMULATION

Liquid

DICAMBA DMA SALT

FREQUENTLY ASKED QUESTIONS

What precautions and restrictions should I follow when applying Dicamba DMA Salt?

Precautions

- Use coarse sprays to avoid potential herbicide drift. Select nozzles which are designed to produce minimal amounts of fine spray particles. Examples of nozzles designed to produce coarse sprays via ground applications are Delavan Raindrops, Spraying Systems XR flat fans or large capacity flood nozzles such as D10, TK10, or greater capacity tips. Keep the spray pressure at or below 20 psi and the spray volume at or above 20 GPA, unless otherwise required by the manufacturer of drift-reducing nozzles. Consult with your spray nozzle supplier concerning the choice of drift-reducing nozzles.
- Agriculturally approved drift-reducing additives may be used.
- To avoid injury to desirable plants, thoroughly clean the equipment used to apply Dicamba DMA Salt before using the equipment to apply any other chemical. See *PROCEDURE FOR CLEANING SPRAY EQUIPMENT* on label.

Restrictions

- Do not treat areas where either possible downward movement into the soil or surface washing may cause contact of Dicamba DMA Salt with the roots of desirable plants such as trees and shrubs.
- Do not apply when spray particles may be carried by air currents to areas where sensitive crops and plants are growing or when temperature inversions exist.
- Do not spray near sensitive plants if wind is gusty or in excess of 5 mph and moving in the direction of adjacent sensitive plants.
- Do not apply Dicamba DMA Salt adjacent to sensitive crops when the temperature on the day of application is expected to exceed 85°F as drift is more likely to occur.

- All crop uses of Dicamba DMA Salt are intended for a normal growing interval between planting and harvest. No crop rotation restrictions exist if normal harvest of treated crop has occurred. If this interval is shortened, including in cover crops that will be plowed under, do not follow up with the planting of a sensitive crop.
- Crops growing under stress conditions such as drought, poor fertility, or foliar damage due to hail, wind or insects, can exhibit various injury symptoms that may be more pronounced if herbicides are applied.
- Consult your local or state authorities for possible application restrictions and advice concerning these and other special local use situations. Tank mix instructions are for use only in states where the tank mix product and application site are registered.

In an effort to reinforce the stewardship needed with respect to the use of dicamba products, Albaugh would like to remind customers of the following:

- At this time Albaugh's dicamba products are NOT approved for application to dicamba-tolerant GMOs, including cotton and soybeans. DO NOT APPLY DICAMBA HERBICIDES TO ANY DICAMBA-TOLERANT GMO CROP UNLESS you use a dicamba herbicide product that is specifically labeled for that use in the location where you intend to make the application.
- Some dicamba products may be labeled for weed control prior to planting a crop and subject to minimum plant-back restrictions.
- IT IS A VIOLATION OF FEDERAL AND STATE LAW TO MAKE ANY APPLICATION OF ANY DICAMBA HERBICIDE PRODUCT UNLESS THE PRODUCT LABELING SPECIFICALLY AUTHORIZES THE USE.
- Contact the U.S. EPA, your state pesticide regulatory agency, or your university Extension Service with any questions about the requirements applicable to the use of dicamba herbicide products.
- In addition, growers and applicators should note that states may have specific requirements applicable to the use of dicamba.
