

RETURN[®] XL

BROAD-SPECTRUM INSECTICIDE WITH SUPPRESSION OF SUCKING AND CHEWING INSECTS, AS WELL AS NEMATODES.

ReTurn[®] XL is a liquid, water soluble insecticide product to be diluted with water for control of many insects, mites and nematodes. Apply at the labeled use rates when insect populations reach locally determined economic thresholds. If needed, follow-up applications may be applied to keep pest populations within threshold limits.

All soil-applied treatments must be incorporated immediately after application to a depth of at least 2 inches by water or mechanical means. ReTurn XL should be placed in the root zone of the plant for best results.

Once the product is mixed in solution, no further agitation is needed in the tank. However, when treatments are made to cotton using oil, maintain agitation in the tank. To obtain thorough and uniform coverage, use sufficient water volume.

PRODUCT FEATURES

- Provides fast-acting, broad-spectrum control of various sucking and chewing insects and control/suppression of nematodes.
- Flexible application methods deliver product directly to the source.
- Decreases nematode feeding, movement, reproduction, and hatching to ensure a healthy root system.
- Active on boll weevil, lygus, stink bugs, thrips, aphids, and many other insect pests.

See label for complete application guidelines and restrictions.

ACTIVE INGREDIENT

3.77 lb/gal oxamyl

IRAC GROUP

1A

FORMULATION

Water soluble liquid

REI

48 hours

COMPARE TO

Vydate[®] C-LV

MODE OF ACTION

Acetylcholinesterase inhibitors
(carbamate)

SIGNAL WORD

Danger

RESTRICTED USE

Yes

PACKAGING

2 x 2.5 gal, 250 gal

EPA REG NUMBER

83100-52-83979

RETURN[®] XL

FREQUENTLY ASKED QUESTIONS

What crop rotation or plant back restrictions does ReTurn XL have?

- Do not plant crops other than those that are registered for use with ReTurn XL within 4 months after the last application. Cover crops that are planted to build the soil or for erosion control may be planted any time, but DO NOT graze or harvest for food or feed.

What is the recommended spray volume for ReTurn XL?

- ReTurn XL applications may be made by ground, air or by using chemigation application equipment. Refer to the crop directions for use section for the application equipment that may be used for each crop.
- For applications made by ground, use a minimum of 5 gallons per acre of water unless otherwise directed on the label.
- For applications made by air, use a minimum of 2 gallons per acre of water unless otherwise directed on the label.
- In some cases where coverage may be difficult to obtain (e.g. dense foliage, closed canopy, waxy leaf surfaces) an adjuvant may improve performance.
